DETAILED ACTION

Allowable Subject Matter

Claims 1-11 are allowed in view of the prior art.

The following is an examiner's statement of reasons for allowance:

As to claim 1, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a scanning ultrasound detection device that uses two-wave mixing in photorefractive interferometry, the device comprising an interferometer with two-wave mixing in a photorefractive crystal that receives an input light beam and generates a signal beam to detect ultrasound vibrations of the target and a reference beam that has interference with the signal beam, and a rotating unit that directs the signal beam to be incident upon difference locations of the target to result in a scanning motion on the target, in combination with the rest of the limitations of the above claim.

With regards to the above, the prior art of record, such as US Pat. 5,680,212 to Blouin et al., discloses the measurement of ultrasonic vibrations in an object using two-wave mixing in a photorefractive crystal. However, the prior art fails to show the combination of the crystal generating the signal beam used for detection and also generating the interference signal after reflection off the target, along with the scanning of the signal beam along the target, in combination with the rest of the limitations of the above claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

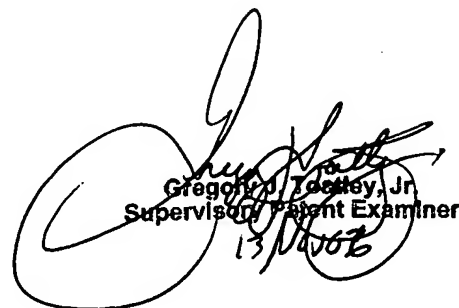

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Pat. 5,827,971 to Hale et al., US Pat. 6,813,951 to Blouin et al., and US Pat. 6,819,432 to Pepper et al.
